

AWELECHUKWU BENJAMIN OFILI

Software Engineer | Full-Stack & Mobile Developer

Flic en Flac, Mauritius | +230 5459 0308 | benjaminofili34@gmail.com
linkedin.com/in/awelechukwu-ofili-3b9450367 | github.com/Benjaminofili

PROFESSIONAL SUMMARY

Early-career software engineer with hands-on experience in full-stack web development, backend engineering, mobile applications and applied AI integration. Experienced with React and Next.js, Django and Python, Flutter, REST APIs, PostgreSQL, Git and Agile development workflows. Completed an Advanced Diploma in Software Engineering with Distinction and currently completing the final year of a BSc (Hons) Business Computing and Data Analytics at Middlesex University Mauritius. Comfortable learning unfamiliar technologies, debugging existing systems, integrating APIs and services, and taking ownership of technical problems.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, Tailwind CSS, Bootstrap

Backend: Python, Django, Django REST Framework, Django Ninja, Flask, Node.js, Express.js, Java, Spring Boot, REST APIs

Mobile: Flutter, Dart, Provider, Bloc/Cubit, Riverpod, Hive

Databases and Data: PostgreSQL, MySQL, SQL, SQLite, Supabase, Redis, pgvector

Applied AI and Integration: Retrieval-Augmented Generation, Hugging Face, Sentence Transformers, vector embeddings, TensorFlow Lite, Grad-CAM, ONNX-based model integration, AI APIs

Engineering Tools: Git, GitHub, Docker, GitHub Actions, CI/CD, Vercel, Firebase, Supabase, Celery, JWT

PROFESSIONAL EXPERIENCE

Software Engineering Intern

August 2025 - September 2025

Imansoft Technologies | Lagos, Nigeria

- Contributed to web and mobile application development within an Agile software-development team.
- Worked across multiple existing applications, including frontend implementation, debugging and application-state issues.
- Investigated software defects, implemented fixes and gained practical experience navigating established codebases.
- Participated in stand-ups, sprint planning and technical discussions supporting team-based software delivery.

SELECTED PROJECTS

MediConnect

Telehealth and Electronic Medical Records Platform

Django | Django REST Framework | PostgreSQL | Supabase | Whereby API | JWT

- Built backend workflows for appointments, consultations and electronic medical records using Django REST Framework and PostgreSQL.
- Integrated authentication, database operations, controlled document access and video consultations through the Whereby API.

AI Support Agent

Multi-Channel RAG Support System

Django Ninja | PostgreSQL | pgvector | Celery | Redis | Hugging Face | Twilio

- Designed a retrieval-augmented generation architecture for customer-support workflows, combining backend, database and AI components.
- Implemented semantic retrieval with vector embeddings and pgvector, supported by Celery and Redis asynchronous workflows.
- Structured communication flows for web, email and messaging-oriented support channels.

SELECTED PROJECTS CONTINUED

Verd

Offline-First AI Crop Diagnostic Application | AgriScan AI Hackathon Finalist

Flutter | Dart | TensorFlow Lite | Grad-CAM | Hive | Firebase

- Developed Flutter mobile functionality for crop-health image analysis with on-device TensorFlow Lite inference.
- Applied Grad-CAM explainability and offline-first storage patterns to support use without continuous connectivity.

Offline AI Voice Translator

Offline Real-Time Speech Translation System

Flutter | Sherpa-ONNX | CTranslate2 | OPUS-MT | Piper TTS | Hive

- Designed and integrated an offline pipeline that orchestrates speech recognition, machine translation and speech synthesis using pretrained models.
- Integrated Sherpa-ONNX speech-to-text, CTranslate2-optimised OPUS-MT translation models and Piper TTS into the application workflow.
- Researched and tested model choices for streaming capability, latency, size and platform compatibility while addressing Windows and mobile ONNX integration constraints.
- Built the initial interface and later collaborated on UI improvements while retaining responsibility for the core translation-system integration.

EDUCATION

BSc (Hons) Business Computing and Data Analytics

2026-2027

Middlesex University Mauritius | Mauritius | Year 3 / Final Year

Relevant study: business intelligence, data analytics, information systems, databases, business technology and data-driven decision-making.

Advanced Diploma in Software Engineering (ADSE) - Distinction

Completed 12 February 2026

Aptech Computer Education | ACE-LAGOS-1-MARYLAND Centre | Lagos, Nigeria
